

CITY SPRINGS

Sandy Springs Performing Arts Center at City Springs

STUDIO THEATRE TECH SPECS

The Studio Theatre is a 5,511 square foot room with flexible staging and seating options that can accommodate a variety of different configurations. The performance and seating area consists of a 3,690 square foot cushioned hardwood performance floor. Portable staging can be placed on top of the wood floor, along with tables and chairs for seating. On the south end of the room, telescoping seating platforms can provide elevated seating, or can be retracted to maximize flat floor space.

STAGE:

The portable stage consists of a StageRight All Purpose 4' x 8' Honeycomb Decks featuring reversible sides with black TechStage and gray carpet surfaces. The room can accommodate a 48' x 20' stage or any variation up to 960 square feet, ranging in height from 18" - 24".

PIPE GRID:

Pipe grids are located over the stage end, floor, and lobby. Grid sizes and capacities are as follows:

Location	Size	Rigging Capacity
Stage End	67'-10" W x 18'-1" D x 21'-10" H	30 plf, or 250# point load
Floor	57'-4" W x 40'-11" D x 21'-8" H	30 plf, or 250# point load
Lobby	37'-3" W x 18'-5" D x 20'-10" H	30 plf, or 250# point load

AUDITORIUM SEATING:

The Studio Theatre features a system of telescopic seating platforms with 198 fixed theatre seats. Additional loose seating can be added in a variety of configurations based upon the setup needs of the performance or event. In addition, the telescopic seats can be retracted to allow access to the full floor for banquet seating or a flexible performance atmosphere. The total capacity of the space is approximately 300 +/-, pending approval of the Fire Marshall.

DRAPERY SCHEDULE:

- Main Drapery: Bipart, each panel 29'-6" W x 19'-6" H
- Legs (tracked): 2 @ 15'-0" W x 19'-6" H
